Yangi imkoniyatlar

Haqiqiy admin panel, o'quvchi yo'lini kuzatish, funksiyalarni boshqarish, duel va do'st taklifi.

1-bosqich tayyor | 2-bosqich tayyor | 3-bosqich: qo'llanma va video

Admin panel

Demo emas — haqiqiy ma'lumot: o'quvchilar, voronka, tugmalar, qurilmalar, kurs, testlar, duellar, takliflar, xodimlar, jurnal.

O'quvchi yo'li

Har kirish: qaysi qurilmadan, qaysi ekranlar, qaysi tugmalar, har ekranda qancha vaqt, qachon chiqib ketdi.

Funksiyalar

CEO keraksiz funksiyani bir bosishda o'chiradi — o'quvchi ilovasidan darhol yo'qoladi.

Duel

Tasodifiy raqib yoki do'st bilan: 5 savol, har biriga 15 soniya. Savollar faqat ikkalasi o'tgan darslardan. G'olib +15, durrang +5.

Do'st taklifi

Shaxsiy havola. Do'st 1-darsni tugatsa — ikkalasiga +50 ball, taklif qilganga bot xabar beradi.

Ruxsatlar

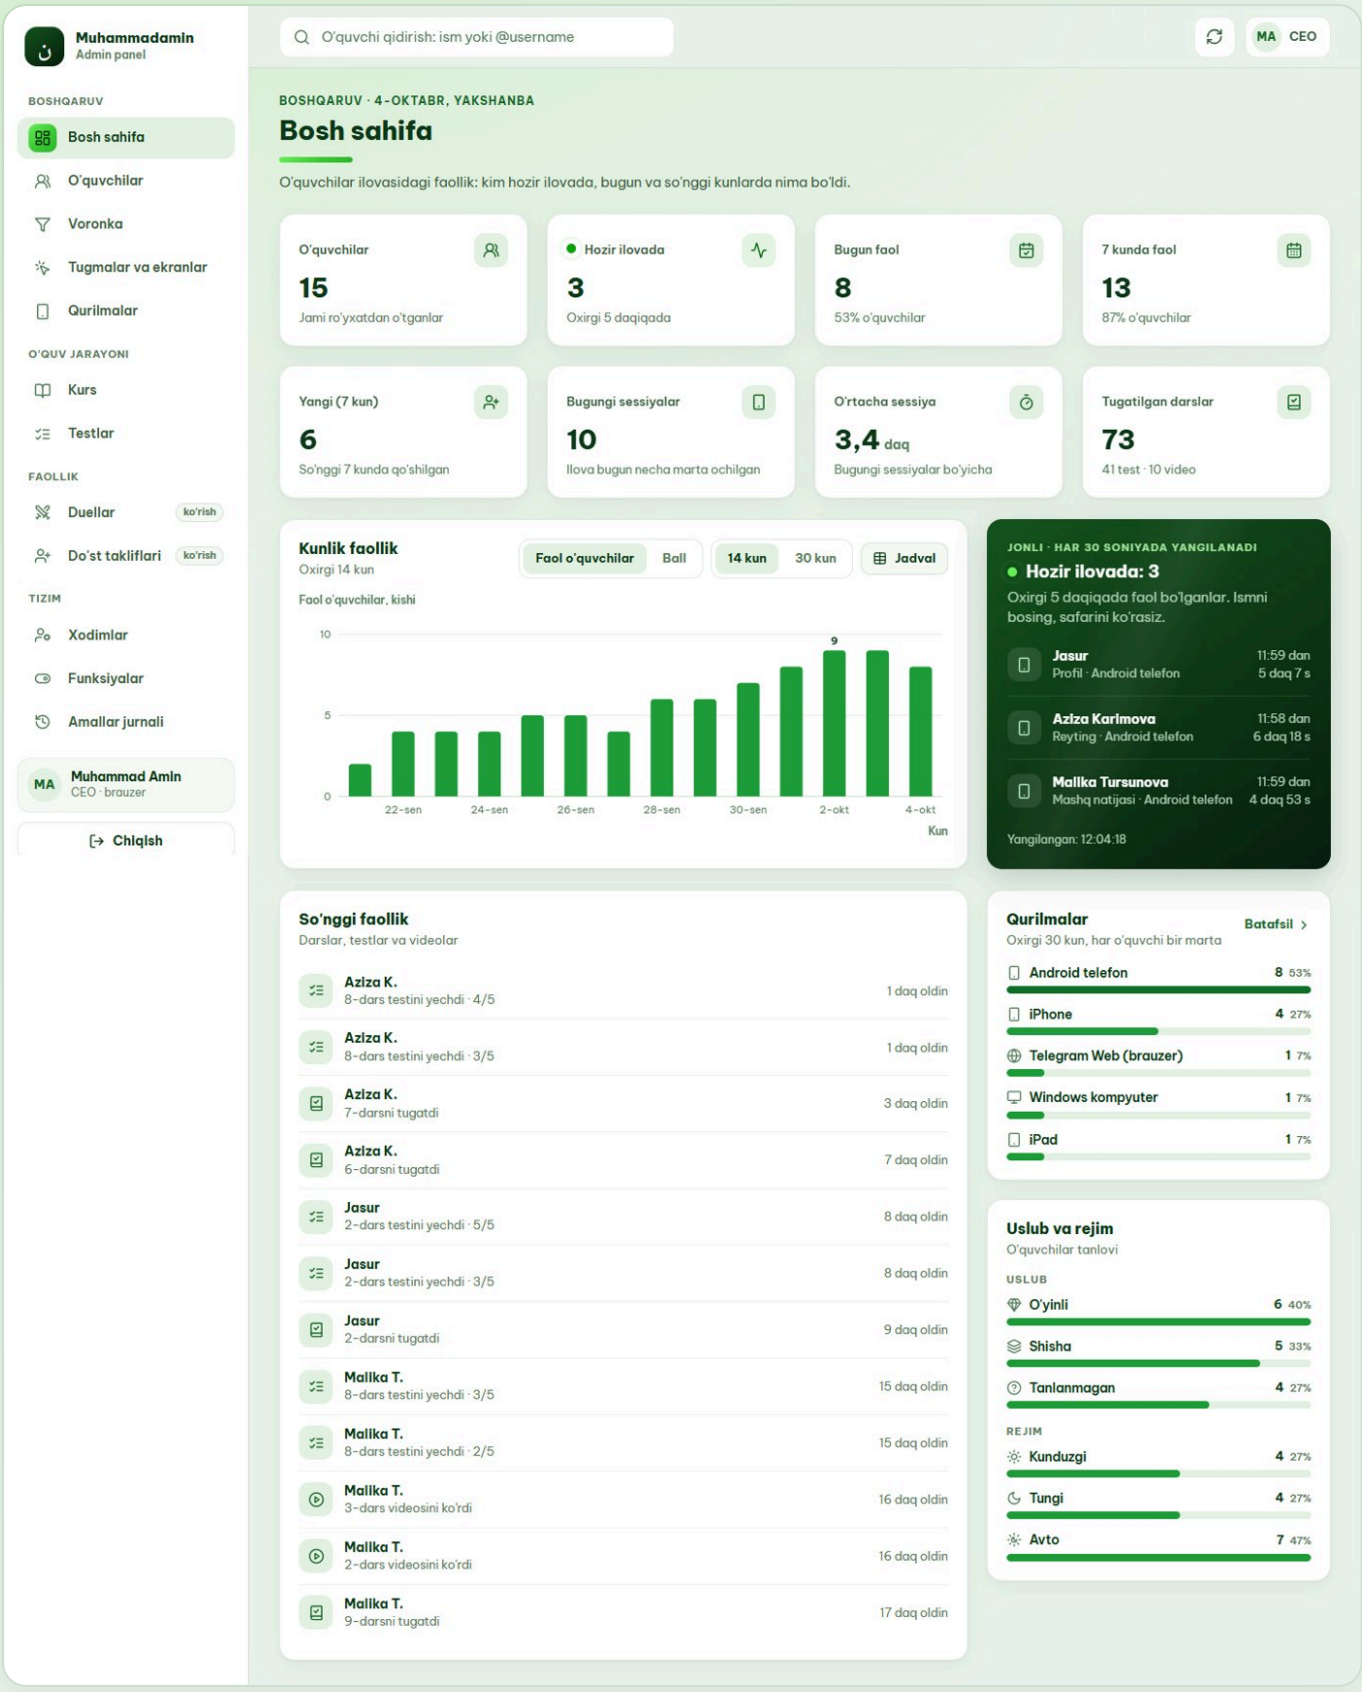

CEO — hammasi. Admin — Funksiyalar va Xodimlardan tashqari. Ustoz — faqat ko'radi. Assistent — kirmaydi.

Admin panelni qanday ochish

1. **Telefonda:** @FonetikaXodimlarbot → pastdagi menyu tugmasi. Panel Telegram ichida ochiladi.
2. **Kompyuterda:** xodimlar botiga **/kirish** deb yozing → "Admin panelni ochish" tugmasi. Havola 10 daqiqa amal qiladi va bir marta ishlaydi; panel 12 soat ochiq turadi.

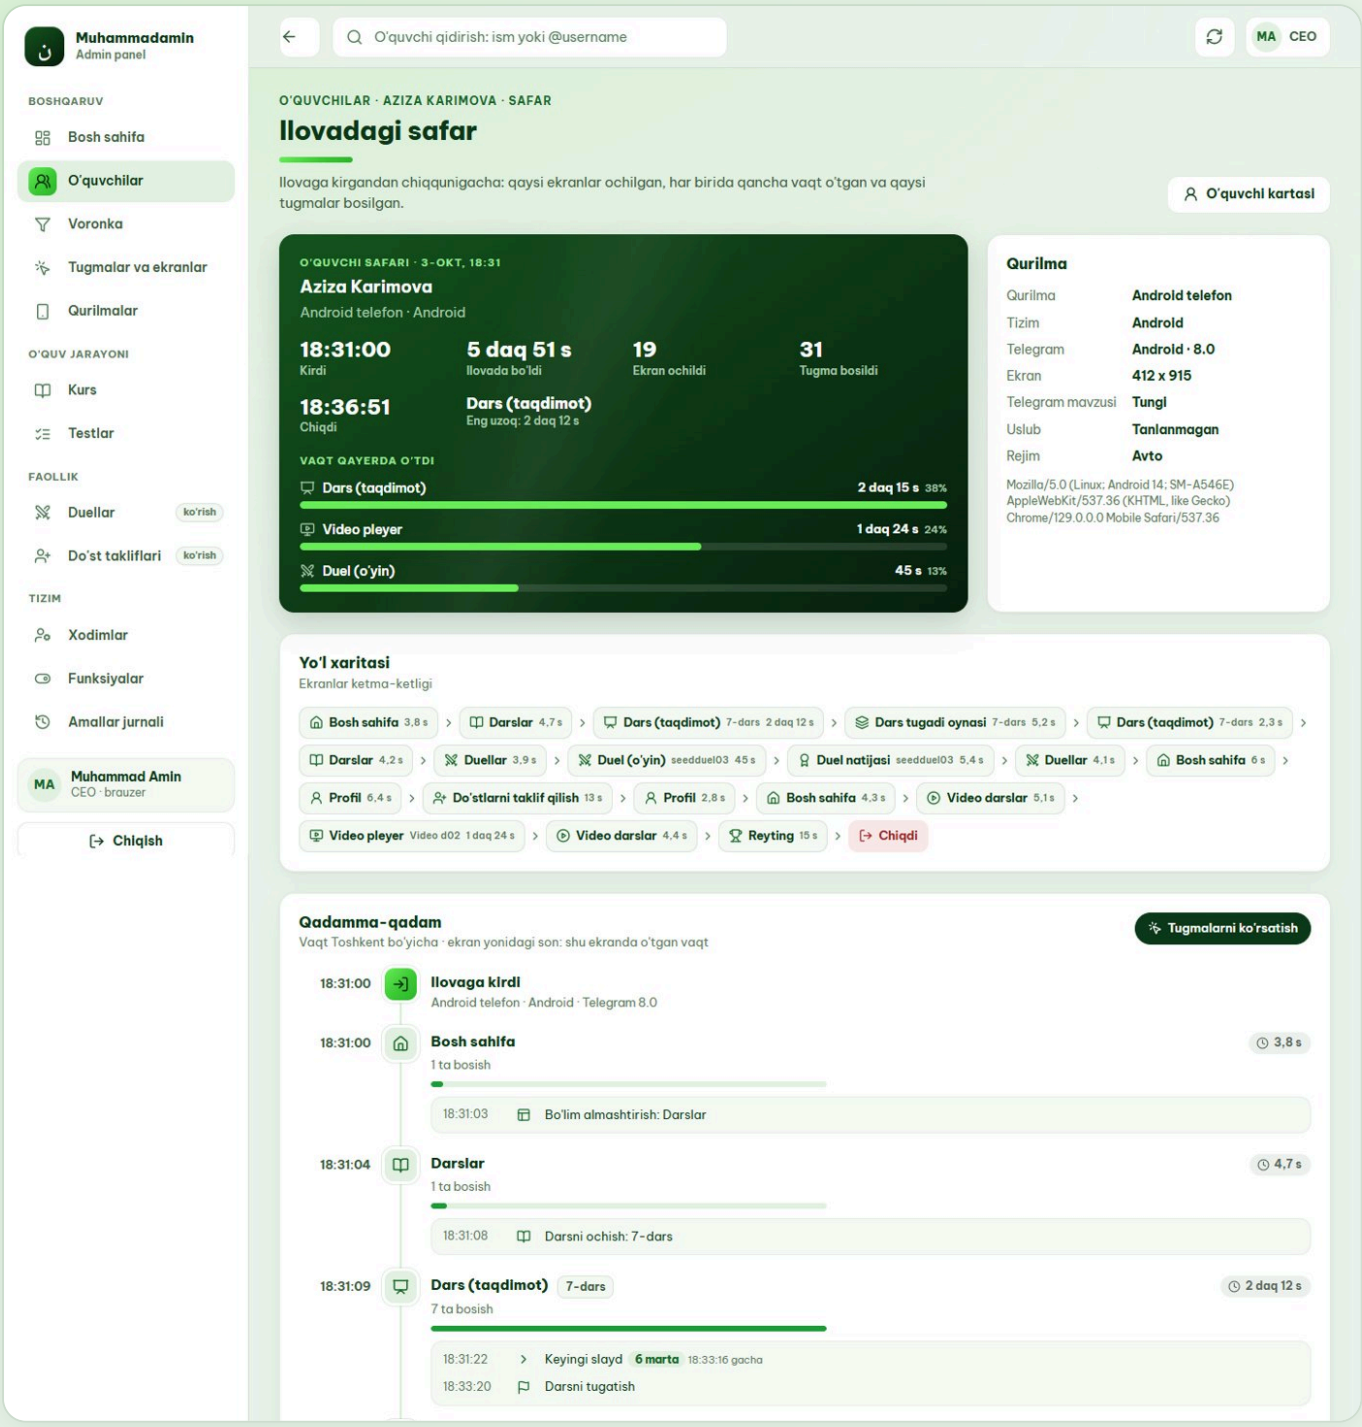

Skrinshotlardagi ismlar va raqamlar — sinov ma'lumotlari. Jonli panelda o'quvchilaringiz ilovani ochgan sari haqiqiy ma'lumot to'planadi.

1. Bosh sahifa

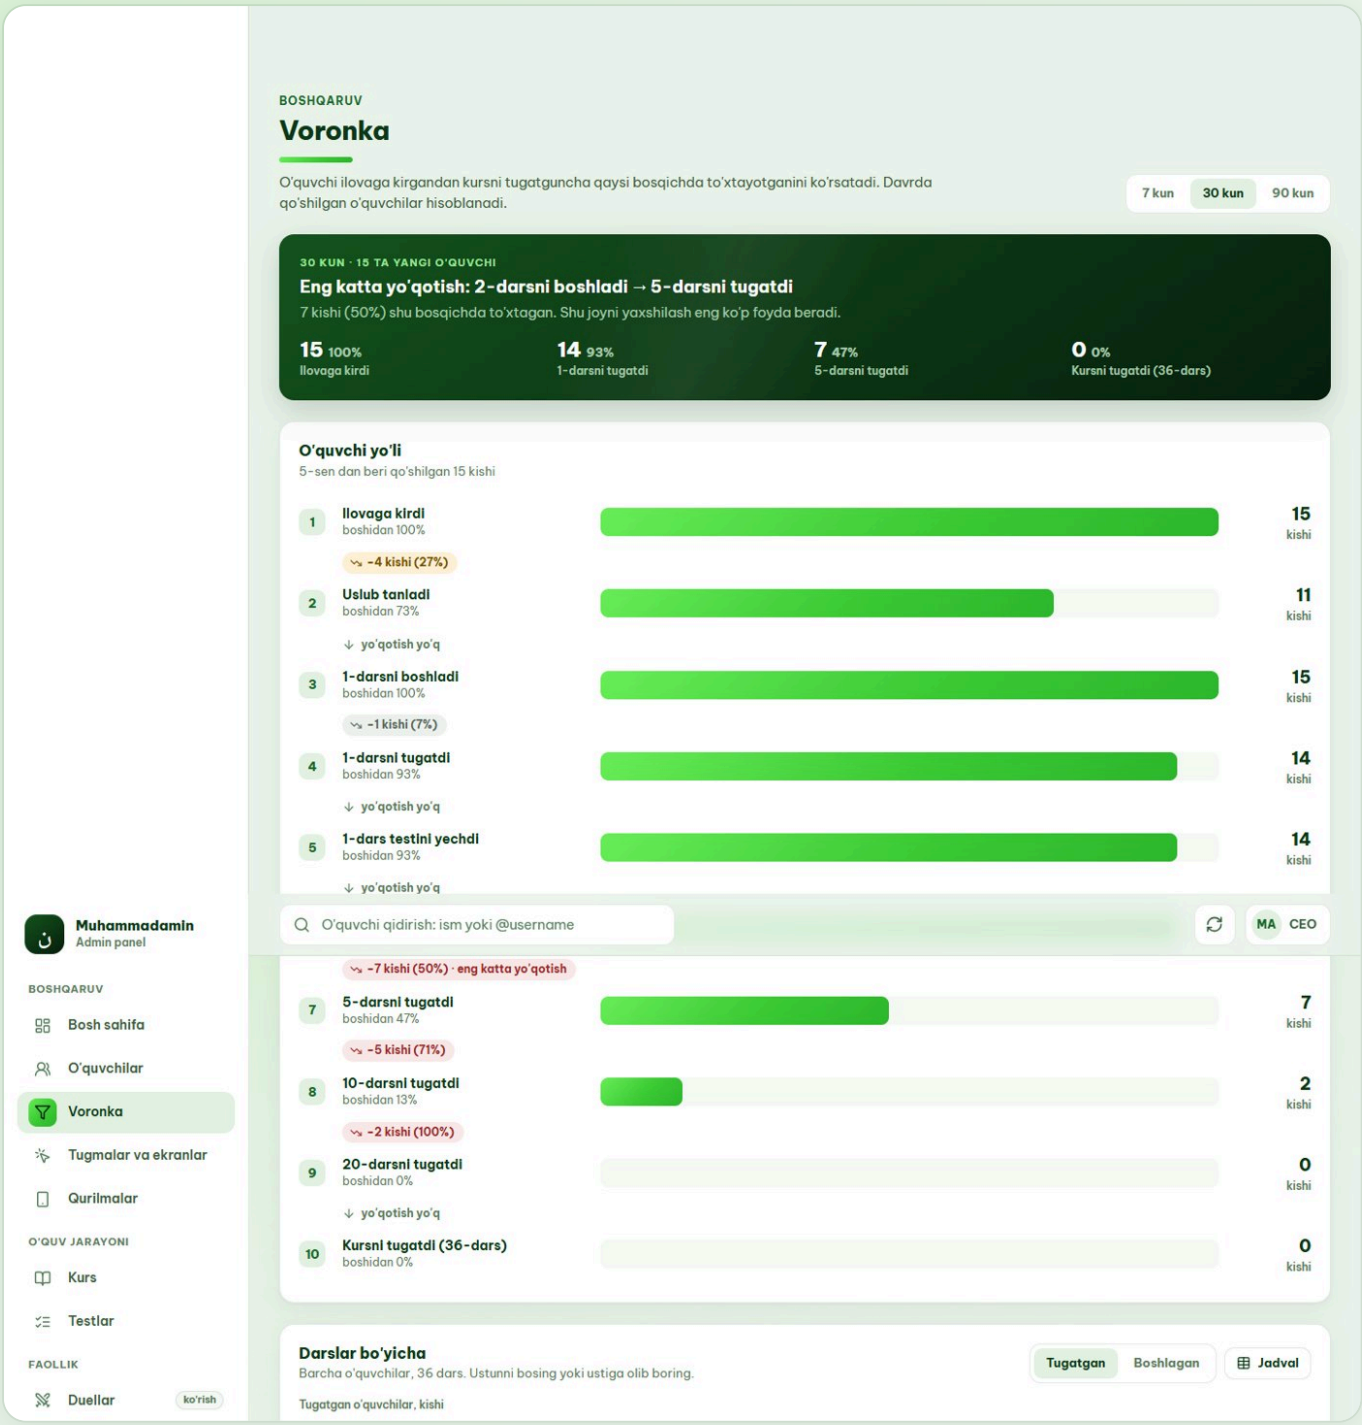

O'quvchilar soni, hozir ilovada kim borligi (har 30 soniyada yangilanadi), bugungi faollik, kunlik grafik, qurilmalar, uslub va rejim tanlovi.

2. Ilovadagi safar — kirishdan chiqishgacha

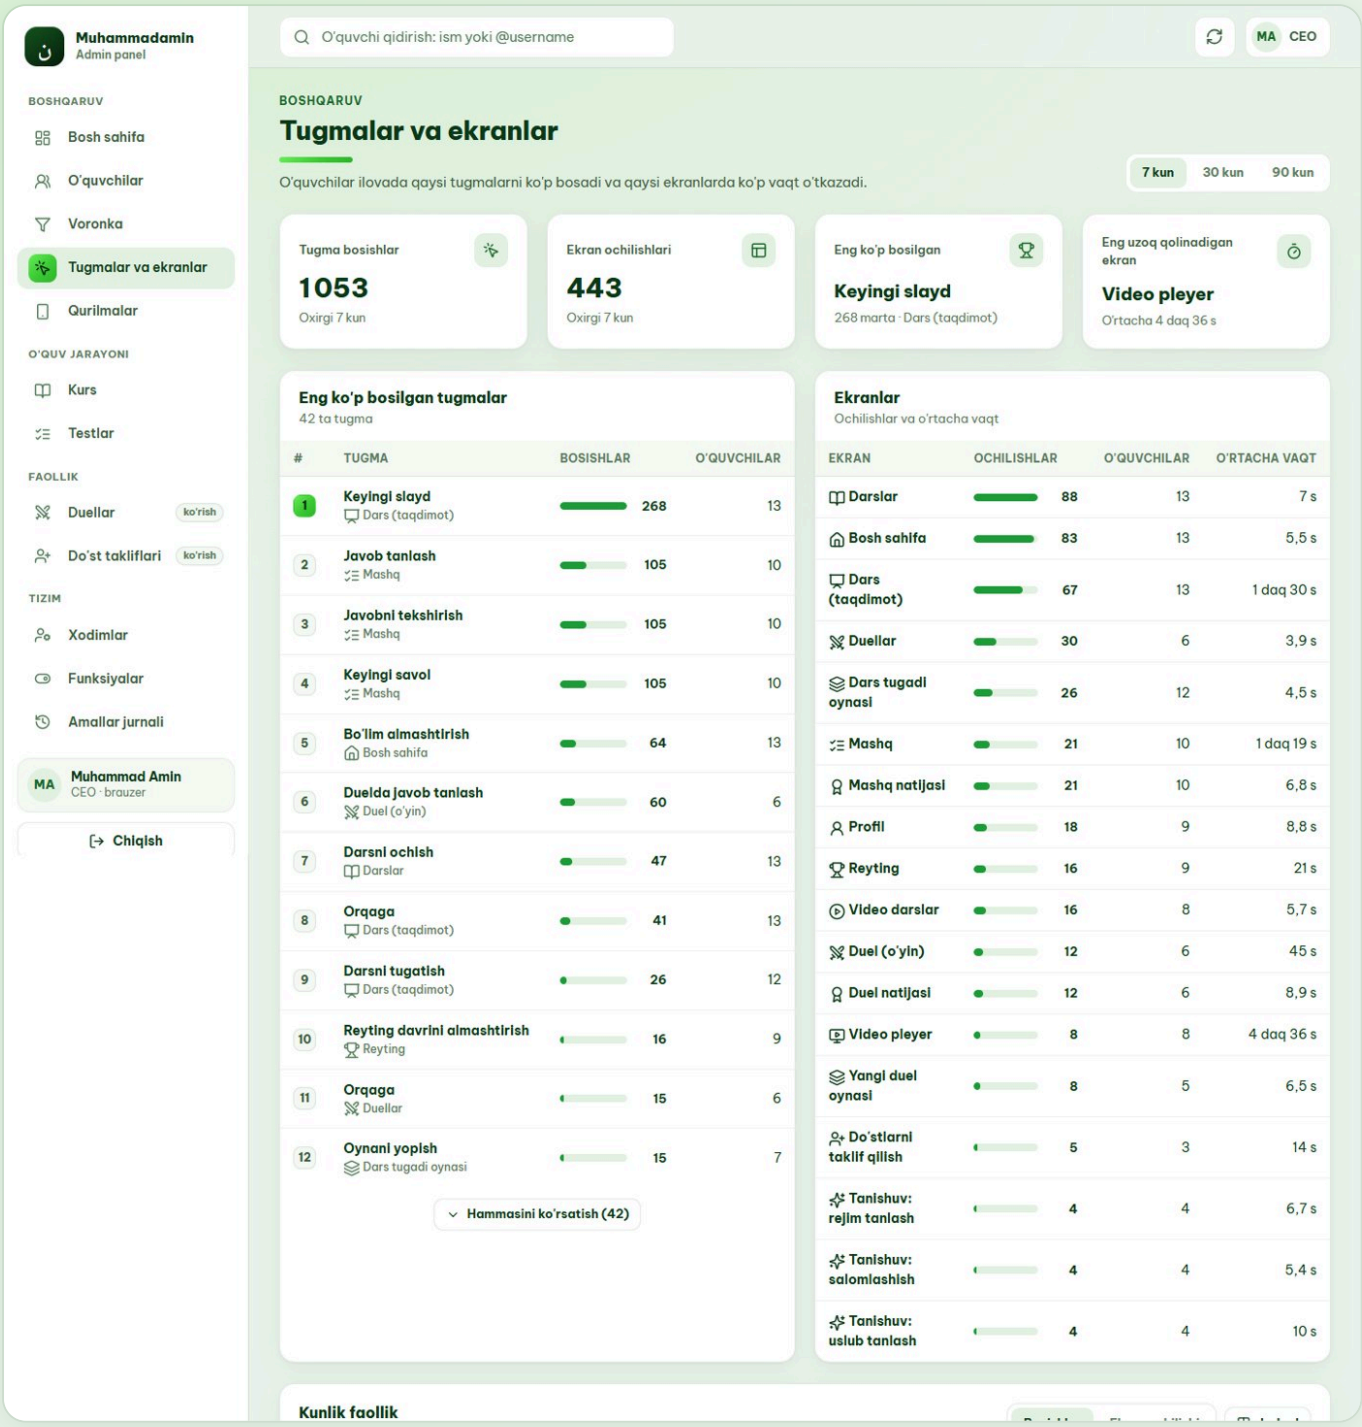

Kirgan va chiqqan vaqt, qurilma, eng ko'p vaqt o'tgan ekranlar, yo'l xaritasi va qadamma-qadam vaqt chizig'i: har ekran, har bosilgan tugma, har ekranda o'tgan vaqt.

3. Voronka — qayerda tushib qolishyapti

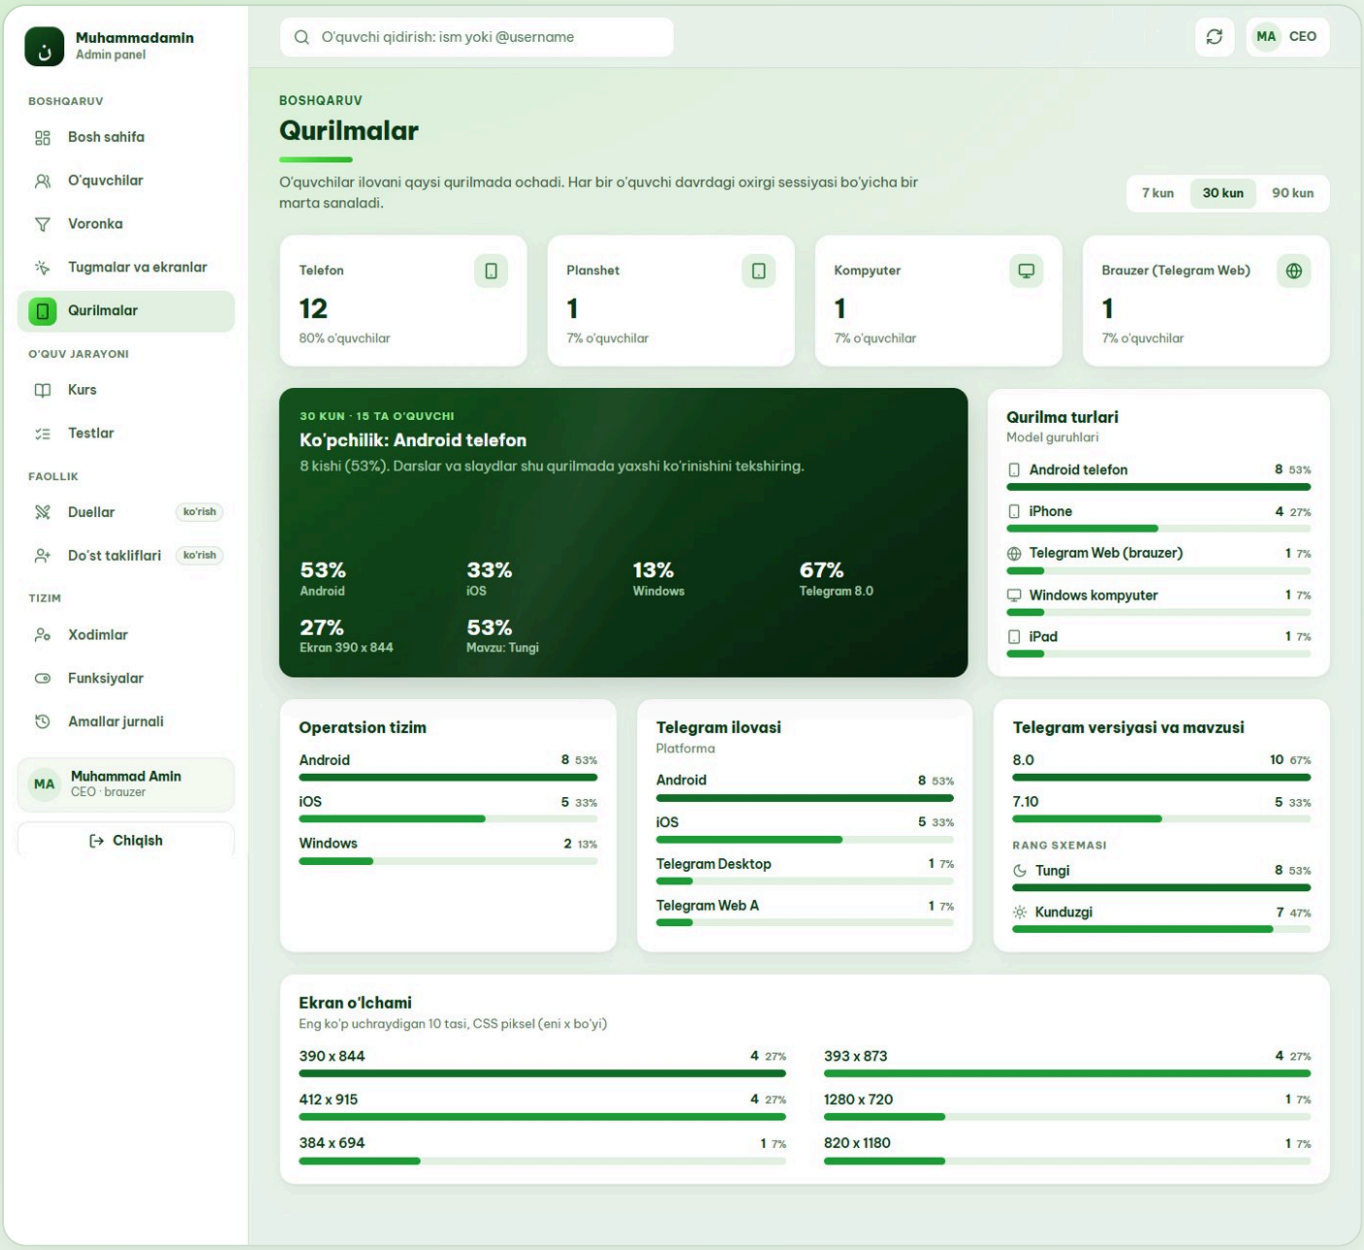

Ilovaga kirdi → uslub tanladi → 1-dars → test → 2-dars … 36-dars. Eng katta yo'qotish alohida ko'rsatiladi.

4. Qaysi tugmalar ko'p bosilyapti

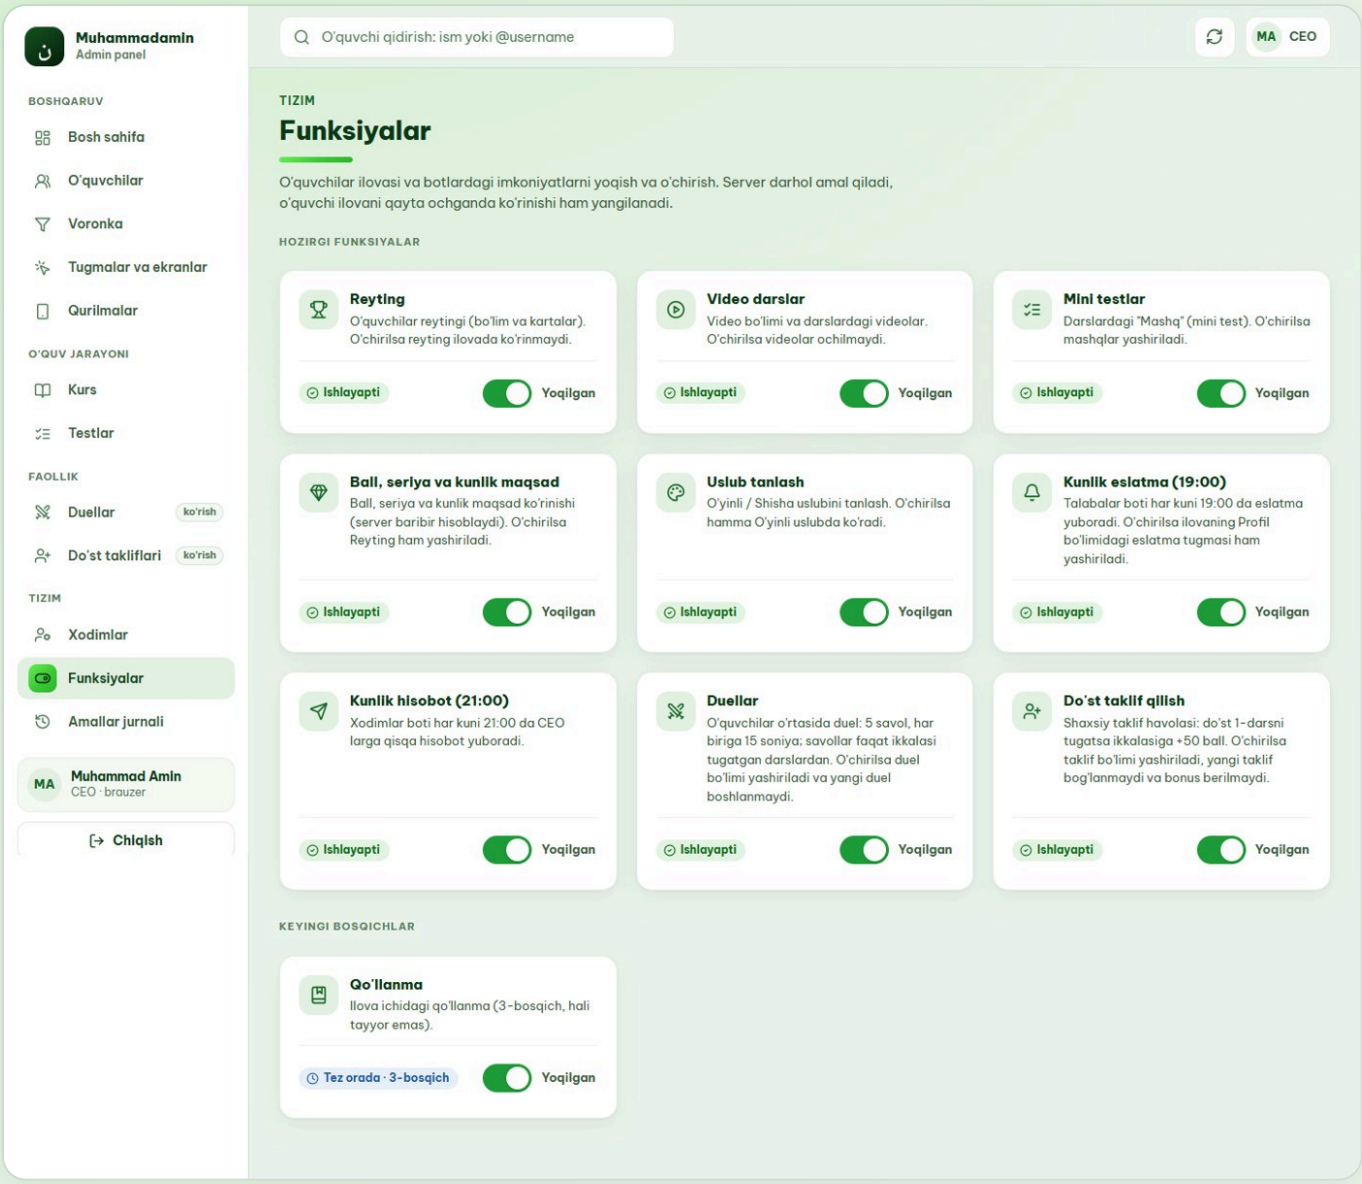

Tugmalar reytingi (necha marta, nechta o'quvchi), ekranlar bo'yicha ko'rishlar va o'rtacha vaqt, kunlik grafik. Davr: 7 / 30 / 90 kun.

5. Qaysi telefondan kirishyapti

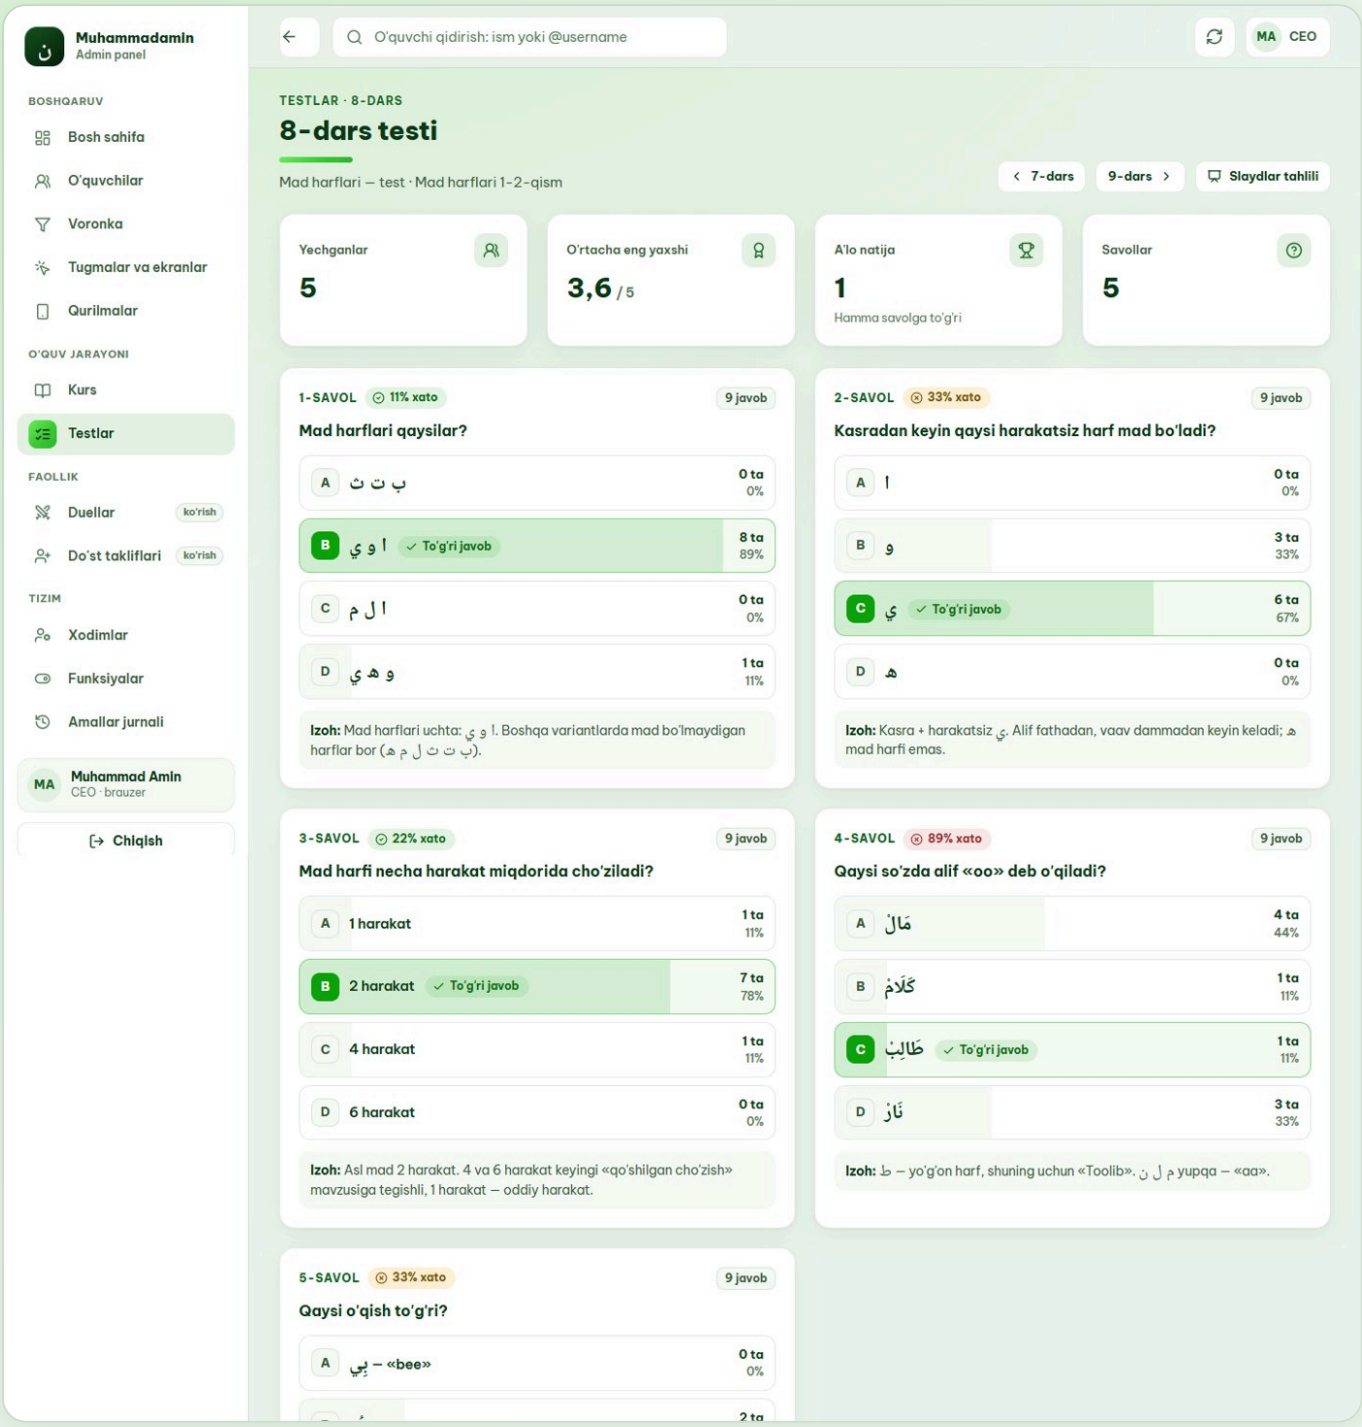

Android / iPhone / kompyuter / brauzer, operatsion tizim, Telegram versiyasi, ekran o'lchami, kunduzgi yoki tungi mavzu.

6. Funksiyalarni yoqish va o'chirish (faqat CEO)

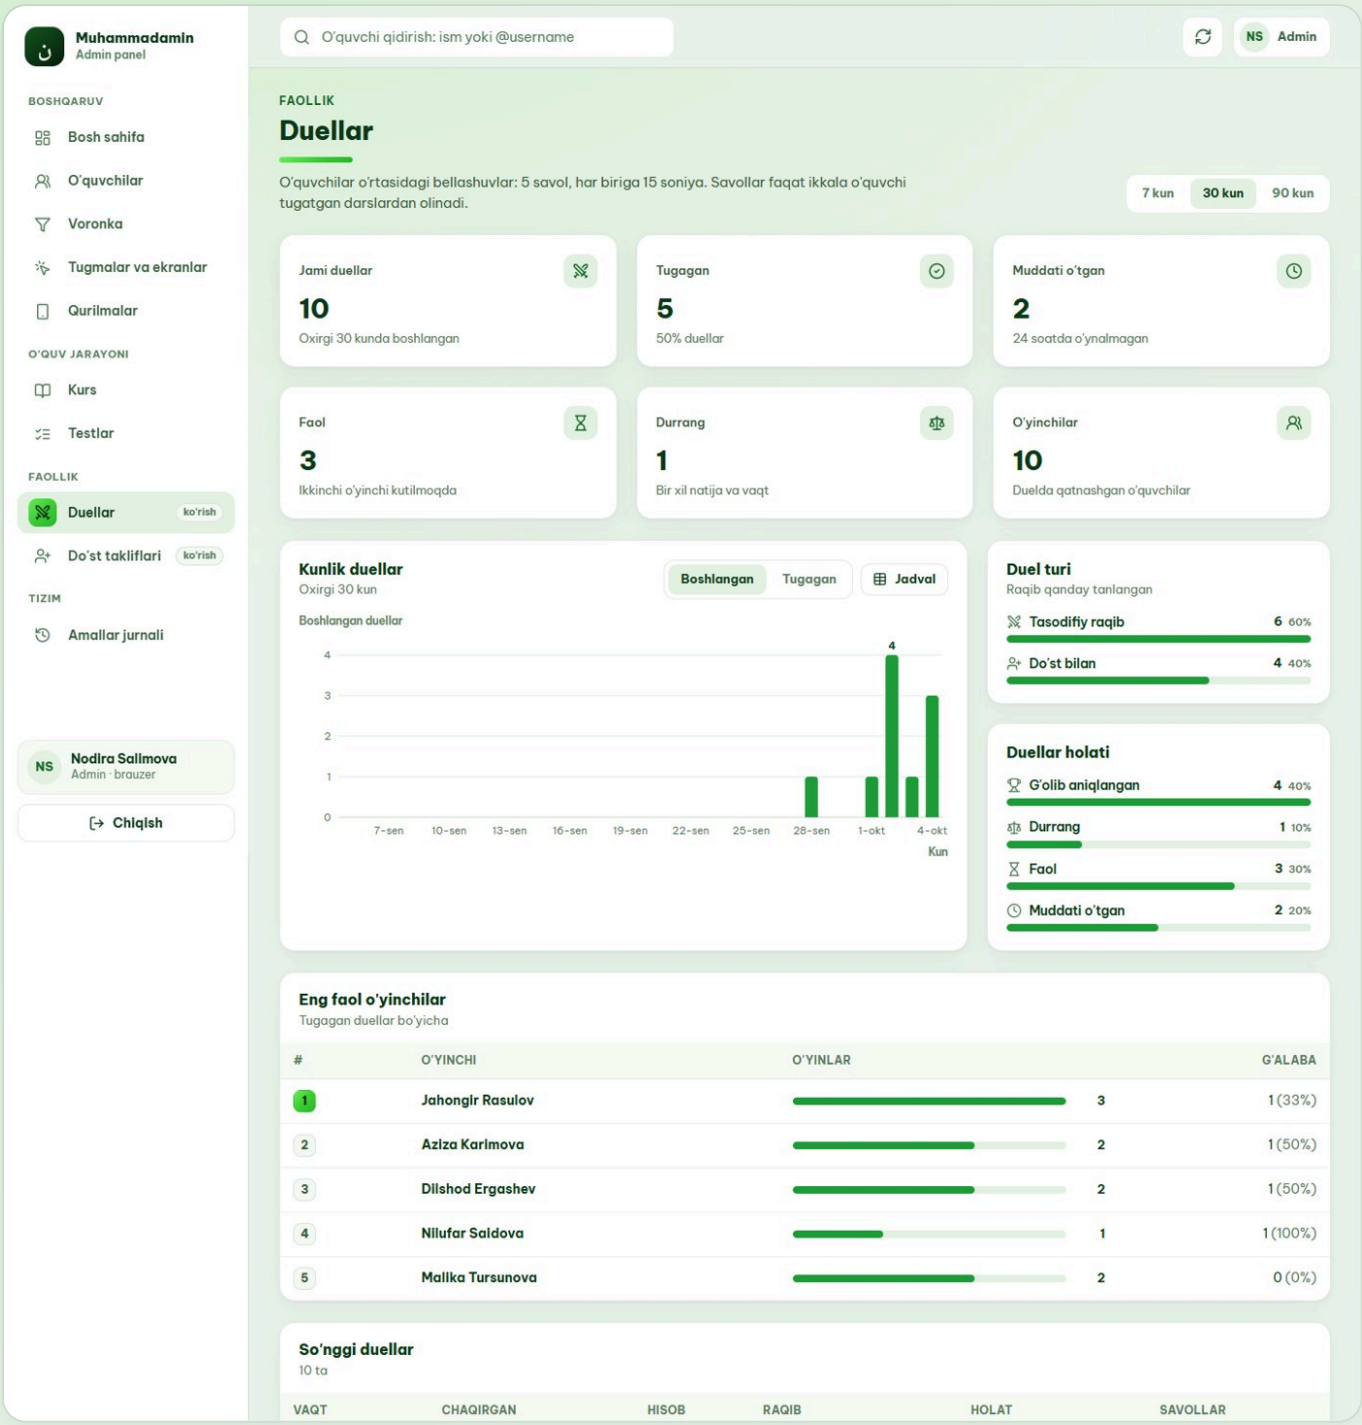

O'chirishdan oldin tasdiq so'raladi. O'chirilgan funksiya o'quvchi ilovasidan darhol yo'qoladi, server ham uni yopadi. Har o'zgarish Amallar jurnaliga yoziladi.

7. Test natijalari — savollar bo'yicha

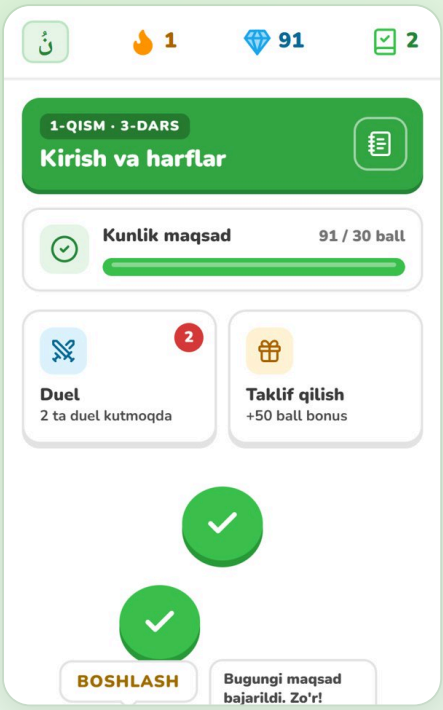

Har savol: qaysi variant necha marta tanlangan, xato foizi, eng qiyin savol. Natijalar 03.10 dan keyingi urinishlardan.

8. Duellar va do'st takliflari

Jami, tugagan, muddati o'tgan, durrang; tasodifiy va do'st bilan; kunlik grafik; eng faol o'yinchilar; so'nggi duellar.
